Radiant Keypad  
(Shown With Hooded Enclosure)

(Shown Without Hooded Enclosure)

- Two different keypad and scrolling options - Standard and Radiant AlphaNumeric
- Alphanumeric, multi-color Radiant Keypad version provides for fast scrolling, no incandescent bulbs
- Stand-alone functionality or seamless integration with Keri's access control system and *Doors* software for real access control + telephone entry
- 4 line, 20 character per line soft white Supertwist LCD display, with up to three programmable scrolling messages
- 750 tenant capacity on all units, customer doesn't pay for extra memory capacity
- Up to 6 digit directory code, 7-15 digit phone numbers
- Networkable to manage multiple doors via RS-485
- Handset, Flush Mount Kit, Hooded Enclosure, Camera, No Phone Line options

Keri continues the prestigious Entraguard™ telephone entry tradition with the new **Entraguard Gold**, a huge step forward for the industry in terms of economy and function. This new unit provides the best telephone entry/access control marriage available by letting the Entraguard function as a node on a PXL controller network and putting both functions under the acclaimed *Doors* software umbrella. Each Entraguard Gold has two extra relay outputs that can be used in a variety of ways, including turning on a lobby light, unlocking an interior door, etc., by tone commands from the tenant's location or based on an access granted decision. An on-board modem is also included for remote programming.

The Standard Keypad version contains a waterproof Class IP65 rated keypad, and maintenance free solid state lighting. The equally durable multi-color Radiant Keypad with AlphaNumeric searching makes it easy for the visitor to locate tenants in a large directory. The unit is designed for durability and weather resistance with a tough 14 gauge steel enclosure and powder-coated finish. Additionally, the radiant keypad has no mechanical or moving parts to wear out. Both units are available with an optional flush mount kit, hooded enclosure, or hand set.

### Remote Programming via Built-In Modem

- Fast, does not require connection to each unit on the line, uses RS-485 system networking

When choosing which Entraguard model to use, the AlphaNumeric Radiant Keypad vs. the Standard Keypad, careful consideration should be given to each location's ambient lighting. The Radiant Keypad may not appear bright enough in direct sunlight, so for those locations that will be in prolonged direct sunlight, the standard keypad may be a better choice.

When using the Entraguard products in a dial-up application, Keri requires the use of an approved modem. Check the web site for the latest list, or call Keri customer service.
